Social media offers a great way to share your message with an engaged and interested audience. Here are some tips to help you create a more accessible social media experience for all users.

### Accessible text
As with other digital formats, genuine text is the most reliable way to convey your message to the most users. Images of text, simulated text, and media must be accompanied by a standard text equivalent.

- Avoid alternate font creators
- Define any acronyms on first use
- Use PascalCase for #Hashtags and @Mentions
- Use emojis sparingly, and at the end of your post

### ALT text for images
As with other digital formats, images embedded in social media can present barriers to access for a variety of visitors. Images in social media must be accompanied by descriptive alternative text.

- Provide descriptive ALT text for all images
- For images that provide timely or critical information (such as event flyers), provide complete information in your primary post
- Describe complex images (infographics) in your post or link to an accessible version

### Captions for digital media
- Add captions or transcripts with embedded digital media
- Link to captioned digital media in YouTube, Vimeo, Panopto, or similar services

### Ensure color contrast
- Make sure your color palette allows for sufficient color contrast and differentiation
- Use a color contrast checker to determine whether two colors have sufficient contrast
- Do not use color as the only means of describing or identifying an object

### Share your message across multiple channels
Different social media channels are designed for different purposes. Be aware of platform limitations and leverage the respective strengths of different channels.

- Include as much information as possible in your social media posts
- Provide links to a website or similar channel with complete, accessible information
- Provide email and contact information prominently in all of your social channels

### Learn more about digital and IT accessibility
Inclusive technology is a core component of the University of Iowa’s commitment to The Digital and IT Accessibility Group offers training and consultation at no cost to University of Iowa groups.

For more information on digital accessibility at the University of Iowa, visit [https://itaccessibility.uiowa.edu](https://itaccessibility.uiowa.edu).

The University of Iowa prohibits discrimination in employment, educational programs, and activities on the basis of race, creed, color, religion, national origin, age, sex, pregnancy, disability, genetic information, status as a U.S. veteran, service in the U.S. military, sexual orientation, gender identity, associational preferences, or any other classification that deprives the person of consideration as an individual. The university also affirms its commitment to providing equal opportunities and equal access to university facilities. For additional information on nondiscrimination policies, contact the Director, Office of Equal Opportunity and Diversity, the University of Iowa, 202 Jessup Hall, Iowa City, IA, 52242-1316, 319-335-0705 (voice), 319-335-0697 (TDD), diversity@uiowa.edu.
